

10th December 2004

COMPANY NEWS

NetPower Asia is Now NetPower International

In a response to an increasing demand for our products and services outside of the Asian markets NetPower Asia has changed the company's name to NetPower International Pte. Ltd

This modification to the name reflects the success and growth of NetPower since its inception early in 2004. The senior management remains unchanged and further announcements regarding increase in staffing levels to support this growth will be made in the coming months.

About NetPower International Pte. Ltd

NetPower International delivers contemporary and refreshing solutions to users of the Internet. Established in April 2004, the company represents technology brands that are expanding into different markets. Through joint venture agreements and/or exclusive distributorship arrangements, our aim is to strategically take working software-based solutions to the international market.

NetPower Network Solutions all share a single powerful medium, The Internet. NetPower has a Wireless Global Roaming Solution for Internet Access (NetROAM™), an Anti-Spam Solution for E-mails (NetPower SafeMX™, www.netpowersafemx.com.sg) and an Intelligent Search Engine for retrieving information and increasing traffic to websites. NetPower also represents one of Australia's fastest growing SMS solution providers (5th Finger).

Our solutions have multiple applications and are scaleable and flexible to suit a specific immediate need or a range of requirements, short and long term.
